О СЕБЕ

AI Transformation Lead / AI Automation Architect with hands-on weekly AI-assisted development using Codex, Qwen, and Kiro across startup and platform work. I build AI-first SDLCs, RAG-enabled knowledge workflows, voice-to-text and OCR pipelines, and production AI systems with human-in-the-loop control, traceability, and measurable business impact.

Selected AI work:

- Production GenAI support automation with LLM orchestration, internal APIs, quality control, and human escalation.
- AI-native SDLC: explicit task artifacts, context management, agent roles, guardrails, validators, and diff discipline.
- AI/automation platforms from concept to pilot and enterprise rollout.
- Hands-on AI development across Python and Java/Spring Boot stacks, with PostgreSQL and Redis as the main backend and workflow layers. Built AI-first SDLC tooling, RAG workflows, voice-to-text and OCR pipelines, and production AI systems with human-in-the-loop control, traceability, and measurable business impact..
- AI-first SDLC tooling and workflow orchestration for a startup and Fincomtech platform work.
- Prototype and integrate solutions on top of OpenAI, Ollama-hosted open models such as Mistral, Google Gemini, Google Gemma, GigaAM, and Yandex models.
- Design knowledge-base and RAG workflows, including voice-to-text, OCR, and human-in-the-loop review.

ОПЫТ РАБОТЫ

CTO & Co-founder · Fincomtech

сентябрь 2023 — настоящее время · Moscow

Co-founding and building a fintech platform from scratch, from product vision to pilots and first customers.

- Defined product development processes, prioritization, release control, and initial engineering governance.
- Worked directly with first customers and enterprise presales to turn business needs into roadmap and pilot scope.
- Led the first version of the platform: architecture, cloud infrastructure, and baseline DevOps.
- Took the product from concept to pilot deployments, proving technical and commercial feasibility.
- Co-founded the company and built the first engineering team and delivery model.

Adviser · Setronica

февраль 2026 — настоящее время · Remote

Implementing AI-native development processes

- Designed a controlled AI-assisted delivery model with explicit artifacts, context handling, agent roles, validators, and traceability.

Co-Founder / Technical Advisor (AI Products) · AI Product Studio

сентябрь 2025 — настоящее время · Remote

Advising early-stage AI product teams on architecture, delivery structure, and quality control for workflow automation initiatives.

- Advising early-stage AI product teams on architecture, delivery structure, and quality control for workflow automation initiatives.

Deputy CTO · Arameem / ToYou

октябрь 2018 — август 2025 · Cyprus

Scaling and governing a high-load delivery platform and a distributed engineering organization.

- Led a distributed technology organization of 200+ people across engineering, QA, and DevOps.
- Managed 14 team leads and functional heads.
- Scaled the platform from 30K to 300K active users and from 100 to 100K+ orders per day, with peaks of 130K.
- Built a transactional architecture handling 1M+ financial transactions per day across payment, commission, payouts, subscriptions, and BNPL flows.
- Led production of GenAI / LLM support automation, integrating internal APIs and business workflows.
- Introduced portfolio visibility, prioritization discipline, release governance, and quality controls.
- Reduced critical production incidents through systematic testing and ownership clarity.
- Cut cloud costs by more than 50% while supporting growth
- Restored delivery capability after the sudden loss of an outsourcing partner and more than 30 people across QA, ERP, and CRM.
- Rebuilt the team in about 1.5 months, kept critical delivery running, avoided major incidents, and ended with a cheaper in-house setup.

CEO & Key Shareholder · Sobit

сентябрь 2014 — октябрь 2018 · Remote

Operating and stabilizing a software company through a commercial downturn and rebuilding the business.

- Stabilized the company after a commercial downturn and restructured the operating model to restore financial control.
- Rebuilt the client base through direct commercial engagement and disciplined cost management.
- Introduced delivery governance and project control mechanisms.
- Negotiated national and municipal digital contracts.
- Reduced operating costs by more than 30%.

Director of IT Department · CDEK

август 2014 — октябрь 2016 · Novosibirsk

Modernizing and stabilizing the core logistics platform after years of technical debt.

- Stabilized and modernized the core logistics platform, which had accumulated over a decade of technical debt.
- Improved system performance by more than 50% through architectural redesign and database optimization.
- Reduced outages by redefining ownership and support functions.
- Shifted the platform toward a more modular, service-oriented structure.

CTO · RTK Engineering

июль 2013 — апрель 2014 · Moscow

Building a payment platform from scratch in a startup and regulated environment.

- Built and led a small team to develop a payment platform from inception.
- Defined architecture, compliance alignment, and release control in a regulated environment.
- Created a working prototype for investor demos under tight time and funding constraints.

Director of Software Development · CFT

сентябрь 2010 — июль 2013 · Novosibirsk

Developing and delivering core banking software and enterprise implementations for financial institutions.

- Led a 60+ engineering department delivering enterprise transaction platforms for major financial institutions.
- Managed multi-year implementations, deployment, and long-term support in a regulated environment.
- Turned client servicing into a recurring revenue model exceeding \$10M annually.
- Worked with bank executives, compliance, and operations teams on presales and rollouts.
- Delivered sustained commercial growth of 20% YoY through disciplined portfolio management and controlled execution.

ОБРАЗОВАНИЕ

BSc in Physics

1994 - 1999

Novosibirsk State University · Novosibirsk

НАВЫКИ

AI & Automation Leadership

AI Transformation Strategy · AI / GenAI Product Discovery · LLM Orchestration · AI Workflow Automation · Human-in-the-Loop Design · AI-Native SDLC · RAG & Knowledge Retrieval · Prompt Engineering & Guardrails

Architecture & Delivery

Enterprise Integration · API & Platform Architecture · Cloud Infrastructure Foundations · Release Governance · CI/CD & Quality Gates · LLMOps & Observability · Delivery Planning & Portfolio Governance

Leadership & Operations

Engineering Organization Leadership · Cross-Functional Alignment · Stakeholder Management · Risk & Capacity Management · Executive Reporting & KPI Tracking · Cost Discipline
